Both manual and automatic transmission was available (four-speed or five speed). It was possible to choose one of the following 1.9L gasoline engines: LK0, L24 or LL0. The second generation offered the same engines except the LK0, and transmission variations remained the same. The model line was extended with a three-door coupe.

I have a 1996 Saturn SL1 with manual transmission with 94,000 miles on it. Recently it is becoming difficult to shift gears. It is starting to require some force to shift from neutral to first, etc. With the engine off there is no problem shifting through the gears. I've noticed that the problem appears related to outside air temperature.
