Data science is an inter-disciplinary field that uses scientific methods, processes, algorithms and systems to extract knowledge and insights from many structural and unstructured data. Data science is related to data mining, machine learning and big data.. Data science is a "concept to unify statistics, data analysis and their related methods" in order to "understand and analyze actual ...

Data science - Wikipedia

Another great way to develop a service learning project is to look within your community for inspiration. In my case, my students wanted to help out a wonderful local charity called Rainbow Village, a shelter for homeless mothers and children getting back on their feet. Of course, I said, "Yes," and we set to work developing a plan.
