Callable bonds may be called prior to maturity and, thus, the term of the investment may be shorter than expected. The option to call a bond belongs to the issuer and not the investor. Calls usually occur when market interest rates decline.

## Callable Bonds - Fixed Income | Raymond James

It is obvious that callable bonds give borrowers the option to refinance when interest rates are low. In other words, it is one way companies hedge against possible decreases in future interest rates. For this reason, callable bonds are very popular before 1990. In fact, before 1970 almost all corporate bonds

## Noncallable - Investopedia

A callable bond (also called redeemable bond) is a type of bond (debt security) that allows the issuer of the bond to retain the privilege of redeeming the bond at some point before the bond reaches its date of maturity. In other words, on the call date(s), the issuer has the right, but not the obligation, to buy back the bonds from the bond holders at a defined call price.

## Callable bond - Wikipedia

To calculate the callable bond value, use the following formula: Value of callable bond = Value of straight bond - Call option value  
Value of callable bond =  $98.0 - 1.75 = 96.25$ . Remember: The call option is of value to the issuer, not the holder.
