The company has offered Geotechnical & Geological Studies as well as soil testing and grading observations to a variety of clients in Southern California. At first, the company's client base was small, and it grew properly over the years through service expansion.

Geotechnical

modelling, their behaviour under a range of conditions and time scales. Particular areas of interest are the modelling of soil-structure interactions including soil-vehicle interactions for extra-terrestrial applications and the behaviour of liquefiable soils subject to seismic and other dynamic effects.

**Geomechanics
Research Group |**

University of Surrey

Honeycomb structure

found in soil contains
particle of size 0.02mm

to 0.002mm which are

generally fine sands or

silts. When this type of

soils is allowed to

settle on the ground,

the particles will attract

each other and joins

one with another and

forms a bridge of

particles.
