## Aging Death And Human Longevity

Dr. Christine Overall, a noted Canadian feminist philosopher, has written a compelling philosophical inquiry into aging, death and human longevity. At the end of her book by the same title, she concludes that other things being equal, a long human life is a better life and that social policies which promote the equal extension of human life to all populations are amply justified.

These findings support the idea of early-life programming of human aging and longevity, and are in a good agreement with our earlier reports on the effects of month-of-birth on mortality in the United States , and are consistent with our study of centenarians and shorter-lived peers (see above). The results of our study were obtained by using a more conclusive within-family analysis, and were not confounded by between-family variation.
