...

spc aiag (SPC) Statistical Process Control is the use of statistical techniques such as control charts to analyze a process or its output so as to take appropriate actions to achieve and maintain a state of statistical control and to improve the process capability. There are two phases in statistical process control studies.

[DOC] Spc Aiag

AIAG Core Tools Statistical Process Control (SPC) is a method of measuring and controlling quality by monitoring the manufacturing process. Quality data is collected in the form of product, process measurement, and readings and is used to evaluate, monitor, and control a process.

(APQP), Production Part Approval Process (PPAP), Failure Mode and Effects Analysis (FMEA), Measurement System Analysis (MSA), and Statistical Process Control (SPC). Statistical Process Control (SPC) is a method that uses control charts as a principal tool in the process of continual improvement. Control charts provide a scientific basis as to the presence or absence of special causes of variation.

AIAG - Core Tool Training - STATISTICAL PROCESS CONTROL ...

Examine methods for implementing and applying the principles of statistical process control to manufacturing processes. This eLearning course will show the linkage of SPC and the Measurement Studies with IATF 16949:2009 requirements and FMEA and PPAP and offer methods for the use of SPC tools and application of software for the calculation of Control Limits and Measurement Studies.
