*7 Fast Facts About the Navy's Newest Radar - AMDR will ...*

SPY-6 is the U.S. Navy family of radars that perform air and missile defense on seven classes of ships. The SPY-6 family are integrated, meaning they can defend against ballistic missiles, cruise missiles, hostile aircraft and surface ships simultaneously.

*U.S. Navy's SPY-6 Family of Radars | Raytheon*

WASHINGTON — Raytheon and the US Navy are at work setting up the first Air and Missile Defense Radar (AMDR) on the shores of Kauai Island in Hawaii, aiming to begin testing on the Pacific Missile...

*Air Missile Defense Radar Amdr*

The AN/SPY-6(V)1 Air and Missile Defense Radar (AMDR) is the Navy's next generation radar system that will address Ballistic Missile Defense (BMD) and Air Defense (AD) capability gaps identified in...

*Air and Missile Defense Radar (AMDR) | World Defense*

Please try again later. Published on Oct 18, 2013 As the world's premier supplier of naval and maritime sensor solutions, Raytheon is providing innovative, affordable and breakthrough capabilities...

*Solid State SPY Radar / Air and Missile Defense Radar (AMDR)*

The Air and Missile Defense Radar (AMDR) is the Navy's next generation radar system that will address Ballistic Missile Defense and Air Defense capability gaps identified in the Maritime Air and Missile Defense of Joint Forces (MAMDJF) Initial Capabilities Document.

*Simulated Engagement: Air and Missile Defense Radar*

Raytheon Co., Marlborough, Massachusetts, is awarded a \$27,344,029 cost-plus, incentive-fee modification to previously awarded contract N00024-14-C-5315 to settle a request for equitable adjustment for contractor provision of Air and Missile Defense Radar (AMDR) program Pacific Missile Range Facility site generators and associated support hardware resulting from a government change order.

*Navy tests AN/SPY-6(V) Air and Missile Defense Radar - UPI*

The AMDR will supersede the AN/SPY-1 radar, and improve the Burke-class destroyer's ability to detect aircraft, surface ships, and ballistic missiles.

*Selected Acquisition Report (SAR)*

Sept. 11 (UPI) --A simultaneous air and ballistic missile defense test using the Navy tests AN/SPY-6(V) Air and Missile Defense Radar has been conducted by the U.S. Navy.The event took place off ...

*Solid State SPY Radar / Air and Missile Defense Radar (AMDR)*

Nov 22, 2019 (HTF Market Intelligence via COMTEX) -- Global Air and Missile Defense Radar (AMDR) Market Insights, Forecast to 2025 is latest research study released by HTF MI evaluating the market,...

*SPY-6 Radar Finishes Final Round Of Developmental Testing ...*

The Solid State SPY Radar is being developed to support Theater Air and Missile Defense requirements as part of a next generation cruiser, CG(X), radar suite. The S-Band Solid State SPY Radar will ...

*Air and Missile Defense Radar (AMDR) Market Future ...*

Description Air and Missile Defense Radar (AMDR) market worldwide is projected to grow by US\$5.9 Billion, driven by a compounded growth of 6.9%. Ground-based, one of the segments analyzed and sized in this study, displays the potential to grow at over 6.9%.

*Air and Missile Defense Radar (AMDR) / AN/SPY-6 | Missile ...*

The Navy's Air and Missile Defense Radar (AMDR) is a next-generation radar system designed to provide ballistic missile defense, air defense, and surface warfare capabilities.

*Air and Missile Defense Radar (AMDR) - GII*

SPY-6(V) is the next-generation integrated air and ballistic missile defense radar for the U.S. Navy, filling a critical capability gap for the surface fleet. AMDR provides greater detection ranges and better discrimination accuracy than the radar onboard today's destroyers.

*Air and Missile Defense Radar Being Readied for Tests*

The Navy's AN/SPY-6(V)1 Air and Missile Defense Radar (AMDR) completed its final round of developmental testing having successfully tracked its 15th ballistic missile target.

*air and missile defense radar | SIGNAL Magazine*

The Air and Missile Defense Radar (AMDR) is the Navy's next generation radar system that will address Ballistic Missile Defense and Air Defense capability gaps identified in the Maritime Air and Missile Defense of Joint Forces (MAMDJF) Initial Capabilities Document.

*AN/SPY-6 - Wikipedia*

The Air and Missile Defense Radar (AMDR), also known as the SPY-6 is a next-generation integrated radar providing both exoatmospheric and air defense, and surface warfare capabilities on U.S. surface ships. 1 These radars will be featured on the Flight III Arleigh Burke Guided Missiles Destroyers and that will include an active electrically scanned array (AESA) that are slated to be 30 times more powerful than the current SPY-1 radar.

*Air and Missile Defense Radar (AMDR)*

Air and Missile Defense Radar (AMDR) The Highly Capable, Truly Scalable Radar The Air and Missile Defense Radar – now officially designated as AN/SPY-6 – is the Navy's next generation integrated air and missile defense radar. It is currently planned to be deployed on the DDG-51 Flight III destroyer.

*The US Navy -- Fact File: Air and Missile Defense Radar (AMDR)*

The AMDR (Air and Missile Defense Radar, now officially named AN/SPY-6) is an active electronically scanned array air and missile defense 3D radar under development for the United States Navy. It will provide integrated air and missile defense, and even periscope detection, for the Flight III Arleigh Burke-class destroyers.
