GRAVITY FEED AIRBRUSH: This method of paint delivery places the paint cup at the top of the airbrush. Gravity alone pulls the paint into the airbrush atomizing chamber. Gravity fed chambers allow for a lower working air pressure which can be an advantage when painting fine lines and details on miniature figures while avoiding over-spray. One possible drawback to the gravity fed style is the ...

While you're decaling, detailing, or weathering your masterpiece, the thinner/cleaner is dissolving dried paint from the internals of your airbrush. This takes time. I find it's better to allow the brush to sit in 1-2ml of thinner for 15 minutes than to shoot 15ml of thinner through the brush in 1 minute.

When painting miniatures and models, some people prefer to use an airbrushing technique over a paintbrush. Airbrushing allows for consistent coverage but requires additional skills and knowledge if you want the best finished product.. Airbrush paint is recommended to paint these surfaces, but the cool thing is that you can use any thinned acrylic paint in an airbrush.
