In designing new aircraft, Airbus always seeks the input of customers and those who handle the jetliners on a day-to-day basis. One of the best illustrations of this approach was the global working group established when Airbus designed the A380, which ensured the world's largest airliner's compatibility with airports around

According to the calculations, each passenger on board an Airbus A320, which has a capacity of 154, costs the airline \$68.50 (£47.06) for the 260-mile journey. The one-hour flight costs the airline an estimated \$2.50 per passenger [for fuel]. The total cost equals \$ 10,549 per hour "with profits as low as \$ 10 [per passenger] on some flights".
