Aircraft Design 3rd Rds Student

RDS win-Student was developed with one purpose in mind - to let students quickly do the mundane analysis tasks so that they can focus upon learning the art and science of aircraft design. In too many engineering colleges, the senior design class becomes an exercise in analysis with a few days spent making a drawing (and for all the wrong reasons), then 95% of the semester spent trying to ...

RDS-Student - Raymer's Aircraft Design & RDS site

RDS features a 3-D CAD module for design layout, and has analysis modules for aerodynamics, weights, propulsion, and cost. Also included are aircraft sizing, mission analysis, and complete performance analysis including takeoff, landing, rate of climb, Ps, fs, turn rate, and acceleration.

The companion RDS-STUDENT aircraft design software is a valuable complement to the text. RDS-STUDENT incorporates the design and analysis methods of the book in menu-driven, easy-to-use modules. Like the book, the program is metric-friendly and all inputs and outputs can be interchanged between metric and fps units with the press of a button.

RDS-STUDENT SOFTWARE AIRCRAFT DESIGN | Aircraft Spruce

RDS win has its own, integral 3-D CAD module that was developed specifically for the design of new aerospace vehicles. It "knows what an airplane is" and has numerous features that allow rapid creation and modification of aircraft and spacecraft components. A new design can be developed in as little as an hour (1-2 days is more typical).

RDS-Student RDSwin 6.0 Software for Aircraft Design by Daniel

ANSWER: RDS win-Professional and RDS win-Student are related versions of Dan Raymer's aircraft design and analysis software, targeted to different audiences. RDS win -Pro is intended for serious professionals in the aircraft design business who work in industry, government, or academia to develop and analyze new aircraft concepts.

RDS-Pro vs Student - Raymer's Aircraft Design & RDS site

RDS win-Professional is the expert's version of RDS win. A sophisticated aircraft design and analysis program, it was developed for use by aircraft designers in industry, government, and academia for aerospace vehicle conceptual design and optimization, technology evaluations, and preliminary performance predictions.

Aircraft Design Software Rev. - Virginia Tech

RDSwin allows engineering students to take a aircraft design from first conceptual layout through functional analysis, leading to performance, range, weight, and cost results. By automating the "grunt work" of vehicle analysis, RDSwin makes enough time for the student to truly learn design.
