~~EASA PART 66 GUIDE: EASA Part 66 :  
Electronics Question~~

Explanation. To test forward bias, the positive lead of the multimeter must be placed on the anode. Note: If the question says 'moving coil meter' then it would be the negative lead on the anode, since the negative side of the battery in such a meter is connected to the + lead. Aircraft Electricity and Electronics 5th Edition Eismin Page 113.
