Ambient intelligence and future trends : International ...

In computing, ambient intelligence refers to electronic environments that are sensitive and responsive to the presence of people. Ambient intelligence was a projection on the future of consumer electronics, telecommunications and computing that was originally developed in the late 1990s by Eli Zelkha and his team at Palo Alto Ventures for the time frame 2010–2020. Ambient intelligence would allow devices to work in concert to support people in carrying out their everyday life activities ...

Ambient intelligence - Wikipedia

Ambient Intelligence (AmI) is a vision of the future that assumes technology will be an integral part of human interactions to the extent that tech will “disappear” and become invisibly integrated into our day-to-day lives.
