cultivating plants and livestock. Agriculture was the key development in the rise of sedentary human civilization, whereby farming of domesticated species created food surpluses that enabled people to live in cities. The history of agriculture began thousands of years ago. After gathering wild grains beginning at least 105,000 years ago,

The word agriculture is derived from a Latin word- ager or agri meaning soil, and 'culture' meaning cultivation of the soil. In modern terms, agriculture comprises "the art and science of cultivating the soil, growing crops and rearing livestock.". You can consider farming to be rather a complete system which includes inputs, processing, and outputs.
