This course will give an introduction to some of the central topics in computational learning theory, a field which approaches the above question from a theoretical computer science perspective. We will study well-defined mathematical and computational models of learning in which it is possible to give precise and rigorous analyses of learning problems and learning algorithms.

Perceptrons (book) - Wikipedia

At a high level, computational learning theory answers the same sort of questions as statistical learning theory ("What kind of guarantees can I make about my learning procedure? In what situations is learning possible?") with different tools and methodology.

An Introduction to Computational Word Learning (Autumn 2003)

Computational learning theory is a branch of theoretical computer science that formally studies how to design computer programs that are capable of learning and identifies the computational limits of learning by machines. Historically researchers in the artificial intelligence community have judged learning algorithms empirically.

This course provides an introduction to computational methods for learning the syntax and semantics of words and multiword expressions based on evidence from language resources (such as dictionaries and thesauri) and actual language usage in text corpora.

## An Introduction to Computational Learning Theory by ...

The book's writing style is clear and pleasant, reflecting the current trend toward intuitive, philosophical presentations of complex technical matters. Although readers should not expect to find plug-and-play algorithms, the book is recommended to everyone as a solid introduction to the theoretical aspects of computational learning.

## A Tutorial on Computational Learning Theory Presented at ...

Perceptrons: An Introduction to Computational Geometry is a book of thirteen chapters grouped into three sections. Chapters 1–10 present the authors' perceptron theory through proofs, Chapter 11 involves learning, Chapter 12 treats linear separation problems, and Chapter 13 discusses some of the authors' thoughts on simple and multilayer perceptrons and pattern recognition.

## Introduction to Computational Learning Theory

The course will begin by providing a statistical and computational toolkit, such as generalisation guarantees, fundamental algorithms, and methods to analyse learning algorithms. We will cover questions such as when can we generalise well from limited amounts of data, how can we develop algorithms that are computationally efficient, and ...
