The principal goal of these benchmark activities was to demonstrate the usefulness of symbolic data analysis for practical statistical exploitation and analysis of official statistical data. This chapter aims to report briefly on these activities by presenting some significant insights into practical results obtained by the benchmark partners in using the SODAS software package as described ...

Exploratory data analysis, data mining, knowledge discovery in databases, statistics, symbolic data, even fuzzy data, and the like, are becoming everyday terms. Symbolic data analysis extends the ideas in traditional exploratory data analysis to more general and more complex data. Siebes (1998) attempts to identify data mining as the step in which

Unlike classical data, symbolic data have internal variation and structure which must be taken into account when analysing the dataset. In this paper, we review briefly types of symbolic data, how they might be analysed and how such analysis differs from a traditional classical analysis.

This first systematic and self-contained monograph on "Symbolic  
Data Analysis" presents the most recent methods for analyzing  
and visualizing symbolic data. It generalizes classical methods of  
exploratory, statistical and graphical data analysis to the case of  
complex data where the entries of a data table are, e. g., sets of  
categories or of numbers, intervals or probability distributions.

~~Symbolic data analysis: what is it? | SpringerLink~~

Symbolic data analysis (SDA) has gained popularity over the past few years because of its potential for handling data having a dependent and hierarchical nature. Amongst many methods for analyzing symbolic data, exploratory data analysis (EDA: Tukey, 1977) with graphical presentation is an important

## ~~SYMBOLIC DATA ANALYSIS: DEFINITIONS AND EXAMPLES~~

In statistics, exploratory data analysis (EDA) is an approach to analyzing data sets to summarize their main characteristics, often with visual methods. A statistical model can be used or not, but primarily EDA is for seeing what the data can tell us beyond the formal modeling or hypothesis testing task.

Exploratory data analysis was promoted by John Tukey to encourage statisticians to explore ...
