All Standards (One Page) - NEMA

A smart meter is an electronic device that records consumption of electric energy and communicates the information to the electricity supplier for monitoring and billing. Smart meters typically record energy hourly or more frequently, and report at least daily. Smart meters enable two-way communication between the meter and the central system.

Quando queimou minha fonte CC ajustável de bancada, de construção artesanal, pensei em comprar uma nova, mas o custo de um equipamento de qualidade me fez optar novamente pelo "faça você mesmo". Vasculhei muitos artigos de eletrônica, em busca de uma fonte com boa relação custo-benefício e que utilizasse peças de fácil reposição.

History. While IEC 60870-5 was still under development and had not been standardized, there was a need to create a standard that would allow interoperability between various vendors' SCADA components for the electrical grid. Thus, in 1993, GE-Harris Canada (formerly known as Westronic) used the partially completed IEC 60870-5 protocol specifications as the basis for an open and immediately ...
