Antarctica. Of the seven continents on planet Earth—North America, South America, Europe, Africa, Asia, Australia, and Antarctica—the last lies at the southernmost tip of the world.It is the coldest, driest, and windiest continent.Ice covers 98% of the land, and its 5,100,000 sq mi (13,209,000 sq km) occupy nearly one-tenth of the Earth’s land surface, or the same area as Europe and the ...

Antarctica | Encyclopedia.com
Antarctica, the world’s southernmost continent, is almost wholly covered by an ice sheet and is about 5.5 million square miles (14.2 million square km) in size. It is divided into East Antarctica (largely composed of a high ice-covered plateau) and West Antarctica (an archipelago of ice-covered mountainous islands).

Antarctica An Encyclopedia From Abbott Ice Shelf To ...
Antarctica - Antarctica - History: Many nations were involved in the discovery and early exploration of Antarctica. About 650 ce, however, long before European geographers of the Middle Ages and the Renaissance were to conjecture about Terra Australis Incognita, a mythical land to the far south. Rarotongan oral tradition tells of Ui-te-Rangiora, who sailed south of Aotearoa (New Zealand) to a ...

Antarctica - History - Encyclopedia Britannica
Coordinates: 77°26′S 167°0′E), also known as Abbots, Dimitri or Demetri's Peak, is a pyramidal peak on Ross Island, on the north side of Mount Erebus, between it and Mount Bird. Charted by the British Antarctic Expedition under Robert Falcon Scott, 1910–13, and named after Petty Officer George P. Abbott, a member of the expedition.

Abbott Peak (Antarctica) - Wikipedia
George P. Abbott (1880–1923) was an explorer of Antarctica, part of the Terra Nova Expedition of 1910–1913. In this service he was one of the castaways of the Northern Party that was marooned overwinter on Victoria Land in 1912.

George P. Abbott - Wikipedia
Antarctica (/ æ n ˈ t ɔː r t i k ə / or / æ n t ˈ ɔː k t i k ə / ()) is Earth's southernmost continent.It contains the geographic South Pole and is situated in the Antarctic region of the Southern Hemisphere, almost entirely south of the Antarctic Circle, and is surrounded by the Southern Ocean.At 14,200,000 square kilometres (5,500,000 square miles), it is the fifth-largest ...

Encyclopedia - The Antarctic Circle
Antarctica is the Earth's southernmost continent.It is on the South Pole.It is almost entirely south of the Antarctic Circle.Around Antarctica is the Southern Ocean.It is the fifth-largest continent in area after Asia, Africa, North America, and South America. About 99% of Antarctica is covered by ice.

Antarctica - Simple English Wikipedia, the free encyclopedia
About 65 million years ago, Antarctica (then connected to Australia) still had a tropical to subtropical climate, with marsupial fauna. About 40 million years ago, Australia-New Guinea separated from Antarctica. This allowed latitudinal currents to separate Antarctica from Australia, and the first ice began to appear in Antarctica.
