Lab 11 Animal Behavior Introduction: Ethology is the study of animal behavior. An animal's behavior is its response to sensory input. There are three types of behaviors: orientation, agonistic, and mating. Orientation behaviors take the animal to its most favorable environment. Taxis is when an animal moves toward or away from a stimulus. ...

AP Bio Lab 11 - Animal Behavior — bozemanscience

I'm having the hardest time with this- i have all of my data recorded about the pill-bugs!! I'm not sure what to respond to these questions.. 1. How was the experiment conducted to obtain necessary data for this lab? 2. How would you design a controlled experiment? 3. What are three characteristics of an experiment that must be present for the experiment to be meaningful?
