A taxpayer can use Form W-2849 to indicate the extent to which he or she authorizes disclosure (e.g., only certain tax types or periods) and can name one or more representatives. The powers granted extend to any matter affecting the tax type and period specifically referred to in the power of attorney unless the taxpayer limits the powers.

AP 614: Power of Attorney | Mass.gov
Generally, API standards are reviewed and revised, reaffirmed, or withdrawn at least every five years. A one-time extension of up to two years may be added to this review cycle. Status of the publication can be ascertained from the API Standards Department, telephone (202) 682-8000. A catalog of API publications and materials is published

Recommended Practice for Machinery Installation and ...
Since 1924, the American Petroleum Institute has been a cornerstone in establishing and maintaining standards for the worldwide oil and natural gas industry. Our work helps the industry invent and manufacture superior products consistently, provide critical services, ensure fairness in the marketplace for businesses and consumers alike, and promotes the acceptance of products and practices ...

AFLD API 614 Series Inline Duplex Filters - 232 PSI • up to 630 GPM HYDRAULIC AND LUBE OIL FILTERS Features • Filter series designed to meet the requirements of API 614 for lube oil and other applications. • Models are available in carbon and stainless steel versions. • Transfer valve internal components of stainless steel.

HYDRAULIC AND LUBE OIL FILTERS AFLD API 614 Series
API 614 Each rotating equipment component has a flow restriction method to meter-in the correct amount of oil for that lubricated bearing. Drainer modules and/or a degassing drum is available as needed depending upon process equipment. The bearing oil outlets are then combined and returned to the oil system or to a reclamation process.

API 614 | Special Purpose Lubrication Systems
Pastebin.com is the number one paste tool since 2002. Pastebin is a website where you can store text online for a set period of time.

API 614 systems can be utilized in the upstream, midstream, and downstream sectors of the oil industry. Lube oil systems that meet the API 614 standard operate at an extremely high level of efficiency, which decreases the cost of operations and decreases the downtime of rotating equipment.

API 614 Lube Oil Systems
pre-engineered API 614 Special Purpose (Chapter 2) systems. With flow rates from 9 GPM to 330 GPM, these designs are durable and optimized for compactness. They can be adapted to meet the needs of your application with minimal engineering, and a wide range of options and accessories are available.

Lubrication, Seal and Piping Systems for Turbomachinery
That was a clue but not the actual answer since the zip file doesn't contain any meta-data. So I looked into how file(1) identifies xlsx files, magic/Magdir/msooxml, and it expects the [Contents_Types] file to be the first element in the zip container. I've pushed a fix to make that the case and now XlsxWriter files are reported correctly:

MIME Type of the generated xlsx file - Issue #614 ...
