Api 6fa Latest Edition | elearning.ala

This standard may be applied to valves that do not meet the requirements of API 6A or API 6D at the user's discretion.

This standard applies to valves with one or more closure members. This standard establishes acceptable levels for leakage through the test valve and external leakage after exposure to a fire for a 30-minute time period.

API STD 6FA - Standard for Fire Test of Valves ...

API 6FA cover the requirements for testing and evaluating the performance of valves when exposed to fire. The burn period of 30 min. has been established on the basis that it represents the maximum time required to extinguish fire. The most important test conditions are: 1) The valve shall be filled with liquid and tested in the closed

API SPEC 6FA, 3rd Edition, April 1999 - Specification for Fire Test for Valves It is the purpose of this document to establish, the requirements for testing and evaluating the pressure-containing performance of API 6A and 6D valves when exposed to fire.

API SPEC 6FA : Specification for Fire Test for Valves

API 6FA is currently in committee for its fourth edition. The third edition has been in place since 1999. As stated above, the standard was written to test API 6A and 6D valves. The test parameters are similar to API 607 for non-soft-seated valves, with the major difference in the operational test procedure after the cooldown period.
