Api Standard 526 Flanged Steel

bellows backpressure to B16.34 ratings, as Std 526 does not specify a bellows material. Bellows materials may vary significantly and the proper source for obtaining the pressure-temperature rating of a bellows is to consult the pressure relief manufacturer. API Standard 526 - Flanged Steel Pressure Relief Valves Last update: May 30, 2007

API Std 526 Flanged Steel Pressure Relief Valves, Fifth Edition. standard by American Petroleum Institute, 06/01/2002. This document has been replaced. View the most recent version.

API - Valve Standards

To clarify, API-526, or rather API-526 STD, is a user STANDARD not a code. It concerns itself about letter (D to T) orifice steel flanged safety relief valves (spring and pilot operated). More so, it covers standardised inlet x outlet size and their flange rating configurations, max set pressures, temperatures etc.
