API 5C3 : 1994 | BULLETIN ON FORMULAS AND CALCULATIONS ...

The collapse strength criteria, given in API Bull. 5C3, Formulas and Calculations for Casing, Tubing, Drillpipe, and Line Pipe Properties, consist of four collapse regimes determined by yield strength and D/t . Each criterion is discussed next in order of increasing D/t . Yield strength collapse

API TR 5C3 - techstreet.com

Here is why that is listed that way according to API: "5C3?s document type was a ?Bulletin? for its first 6 editions. When its

Acces PDF Api Tr 5c3

document type was changed from a Bulletin to a Technical Report, it was mistakenly re-editioned to a 1st Edition based on that change, making it TR 5C3 1st Edition when it really should have been TR 5C3 7th Edition.

A triaxial based collapse strength method was recently adopted by the American Petroleum Institute (API), and an addendum issued to API Technical Report 5C3 (TR 5C3). The triaxial based collapse formula incorporates internal pressure and axial load into the calculation of casing and tubing collapse strengths.

API | Standards Plan

API TR 5C3 illustrates the equations and templates necessary to calculate the various pipe properties given in International Standards, including: pipe performance properties, such as axial strength, internal pressure resistance, and collapse resistance, minimum physical properties, product assembly force (torque), product test pressures,

Calculations for joint strength can be found in API bulletin 5C3. Published joint strength of API connections is based on the ultimate strength of the pipe and not the yield strength. Most, but not all premium connections are based on the yield strength of the connection.
