Asthma in the Workplace, Fourth Edition - OEM Press

Occupational asthma is asthma that's caused by breathing in chemical fumes, gases, dust or other substances on the job. Occupational asthma can result from exposure to a substance you're sensitive to — causing an allergic or immunological response — or to an irritating toxic substance.

Occupational asthma - Symptoms and causes - Mayo Clinic

File Type PDF Asthma In The Workplace Fourth Edition

Occupational asthma is asthma caused by, or worsened by, exposure to substances in the workplace. These substances may cause asthma in one of 3 ways: An allergic reaction (like people with...

Occupational Asthma Causes, Diagnosis, Treatments, and More

Work-related asthma is asthma triggered by an exposure at work. Many asthma triggers can be found in the workplace. Over 300 known or suspected substances in the workplace can cause or worsen asthma. Avoiding triggers can prevent asthma from getting worse.

Work-related Asthma | NIOSH | CDC

Because asthma typically impairs the proper function of the respiratory system, it is often found to be a disability. If your asthma is a disability, you have a right to reasonable accommodation: changes to the job or workplace that will allow you to perform the essential functions of your job. Often, accommodations for asthma involve air quality.

Does my employer have to accommodate my asthma? | Nolo

According to the American Lung Association, 1 of every 12 adults live with asthma, and nearly 22 percent of those adults say that their symptoms get worse from exposure to triggers at work.

Can I Request a Reasonable Accommodation for Asthma?

Tarlo SM, Malo JL; An official American Thoracic Society proceedings: work-related asthma and airway diseases. Presentations and discussion from the Fourth Jack Pepys Workshop on Asthma in the Workplace. *Ann Am Thorac Soc.* 2013 Aug;10(4):S17-24. Tarlo SM. Prevention of Occupational Asthma in Ontario. *Can J Physiol Pharmacol.* 2007 Jan; 85(1):167-72.

Study Search: Prevention of Occupational Asthma | NIOSH | CDC

A new report from the CDC shines a light on asthma in the workplace. Overall, the report finds 6.8 percent of employed adults have asthma — some 11 million people. The highest prevalence occurs in the health care and social assistance industries, where 8.8% suffer from the condition.

Asthma in the Workplace: What RTs with Asthma Have to Say ...

Work-related asthma is a common occupational lung disease. The scope of the Fourth Jack Pepys Workshop that was held in May 2010 went beyond asthma to include discussion of other occupational airway diseases, in particular occupationally related chronic obstructive pulmonary disease (COPD) and bronchiolitis. Aspects explored included public health considerations, environmental aspects, outcome after diagnosis, prevention and surveillance, and other work-related obstructive airway diseases.
