Beginners Guide To Plc Programming

When the PLC was invented, designers found a way to use the existing knowledge of the Relay Control System designers for programming the PLC. Another reason is that the PLC programmers usually prefer to define the actions in terms of contacts, which again was the most commonly used control system before the PLC.

Ladder logic (also known as ladder diagram or LD) is a programming language used to program a PLC (Programmable Logic Controller). It is a graphical PLC programming language which expresses logic operations with symbolic notation. Ladder logic is made out of rungs of logic, forming what looks like a ladder – hence the name ‘Ladder Logic’.
