Basics: 2009, softcover, 224 pages, 200 color photos of 100 species, one page of general natural history and a range map for each bird I found this book to be more enjoyable than I anticipated. The good color photos and the selection of some very interesting birds make the book attractive.

Amazon.com: Customer reviews: 100 Birds to See Before You Die

Below are 40 examples of photos of birds in flight. You will of course notice that many of those photos show the bird against a blue sky, which is to be expected with bird photos, but the real challenge comes with creating a great composition and ensuring that you capture an interesting moment.

40 Wonderful Photos of Birds in Flight | Contrastly

And no doubt, a lot of species do make a plain, not-that-interesting, sounding kind of crow-like, squawk. Parotia's do that, a handful of other things do that. But, that being said, the ones that do have interesting sounds, they sound nothing at all like even a bird. In fact, many of them don't even sound like things made by a living organism.

1. Cockatiels make great first pets — feathered or otherwise. Without a doubt, cockatiels, which are one of the smaller species of pet parrots, are the first bird I recommend for new pet owners or families, especially those with elementary school-age children or older. They are large enough to be sturdy in the hands of a child (although always under adult supervision, please!) but not so large ...
