cancer are you most excited about following in the next 2 to 3 years or so?

Future Therapies in Breast Cancer and Final Thoughts

Breast cancer treatments are local or systemic. Local treatments are used to remove, destroy, or control the cancer cells in a specific area, such as the breast. Surgery and radiation treatment are local treatments. Systemic treatments are used to destroy or control cancer cells all over the body. Chemotherapy and hormone therapy are systemic treatments. A patient may have just one form of treatment or a combination, depending on her individual diagnosis.

Breast Cancer Management and Treatment | Cleveland Clinic

After your operation, your doctor may recommend additional treatment (adjuvant therapy) with anti-cancer drugs (chemotherapy), radiation therapy or hormone therapy to prevent a recurrence of breast cancer. Your specific treatment will depend on the extent of the cancer and whether your tumor tests positive for certain characteristics, such as having estrogen or progesterone receptors.

Paget's disease of the breast - Diagnosis and treatment

...

Severe pain or large, painful cysts associated with fibrocystic breasts may warrant treatment. Treatment options for breast cysts include: Fine-needle aspiration. Your doctor uses a hair-thin needle to drain the fluid from the cyst. Removing fluid confirms that the lump is a breast cyst and, in effect, collapses it, relieving associated discomfort.
