Changing The Course Of Aids

Changing the Course of AIDS is an in-depth evaluation of a new and exciting way to create the kind of much-needed behavioral change that could affect the course of the global health crisis of HIV/AIDS. This case study from the South African HIV/AIDS epidemic demonstrates that regular workers serving as peer educators can be as—or even more—effective agents of behavioral change than experts who lecture about the facts and so-called appropriate health care behavior. After spending six years ...
