The Periodic Law

questions in the space provided. 1. Identify the element and write the noble-gas notation for each of the following: a. the Group 14 element in Period 4

Chemistry Chapter 5 Exam

The left side of the periodic table is composed of metals, which have few valence electrons. Moving to the right, there are more electrons and their mobility is less, reducing their metallic properties. When most of the orbitals are filled, the atoms take on nonmetallic characteristics. When orbitals are full, a noble gas configuration is attained. Metals become positive ions. When sodium ...
