Moreover, Chinese is a tonal language with four different tones. So you must pay attention to the tones of each character and word. Listen to more audio recordings materials and read after the native speaker as closely as you can, following along with a pinyin pronunciation guide. If your pronunciation is

the effect of different accents on high- and low-proficiency second language (L2) learners. It begins with testing the English listening proficiency of Chinese students and then compares the influence of three accented English (a British accent, an Australian accent and an Indian accent) on their listening scores.
