With multiculturalism spreading through the world, many parents may begin to wonder about what kind of influence their family, ethnic or national culture will have on their growing adolescents. While puberty and the issues of becoming an adult are similar for all teens, what they implicitly emphasize in how they grow differs based on culture.

Effective CBT with culturally diverse children and adolescents

Children and families from culturally diverse groups have unique needs that are not always met by our current health care system. They may have more difficulty finding health care providers or be at risk for higher rates of medical or mental health conditions.

Diversity and Culture in Child Mental Health Care

Children growing up in different cultures receive specific inputs from their environment. For that reason, there's a vast array of cultural differences in children's beliefs and behaviour. Language...

backgrounds. These guidelines describe useful theoretical constructs, suggest ways to sensitize assessments of minority children, and outline treatment strategies to obtain better clinical results.

Culturally Diverse Children and Adolescents. Assessment ...

Adolescence can be a time of increased conflict between parents and their children. Peer groups offer their members the opportunity to develop social skills; however, they can also be the source of negative influences, such as peer pressure. Culture is learned and socially shared and affects all aspects of an individual's life.

Cultural and Societal Influences on Adolescent Development

Treatment of Culturally Diverse Children and Adolescents ...

In an increasingly multicultural society, clinicians must learn to work effectively with people from a variety of backgrounds. Culture is defined by shared attributes of a particular group, including a common heritage, set of beliefs, norms, and values (U.S. Surgeon General 2001). A number of cultural influences may play an important role in shaping an individual's identity, including ...

Culturally Diverse Children and Adolescents ...

Children and adolescents vary in the nature of their responses to traumatic experiences. The reactions of individual youths may be influenced by their developmental level, ethnicity/cultural factors, previous trauma exposure, available resources, and preexisting child and family problems.
