Department of Information and Communication Systems ...

We support helpful communication across the whole university and beyond - also any good ideas are appreciated. The Department of Information and Communication Engineering (ICE) has a group of highly qualified, friendly and energetic teachers educated from different reputed Universities who are directly associated with the program. Detail

| *DICT*

The objective of Department of Information and Communication Engineering is research and education that advance and create technologies for computing, information processing, networking, communication, signal processing, media/contents, and other related fields, built on modern and future electronics/optics.

Department of Information Technology and Electrical ...

April 28th, 2018 - WelcomeThe Engineering and Information Technology provides a variety of study options in the fields of engineering and information technology from diploma level through to postgraduate research degrees As an engineering student you will explore a fascinating field of applied science through teaching programs that have a strong design and "Department of

Department of Information and Communications Engineering ...

The Department of Information and Communication Systems Engineering strives to train engineers with the array of skills needed to support the next-generation communication technology. An extensive range of topics will be covered, ranging from hardware, such as antennas and electronic circuits, to software, including programming of communication protocols and communication network construction.

Department of Information & Communication Systems Engineering

The Information and Communication Engineering (ICE) Research Group is motivated by the explosive growth in demand for increased network bandwidth and services. We address cutting-edge aspects of current and future technologies required to engineer the communications networks and information services that will support a data-driven society in both the near and long-term future.

Department of Information Engineering, CUHK

Information and communications technology (ICT) is an extensional term for information technology (IT) that stresses the role of unified communications and the integration of telecommunications (telephone lines and wireless signals) and computers, as well as necessary enterprise software, middleware, storage and audiovisual systems, that enable users to access, store, transmit, and manipulate ...

Department of Engineering, University of Cambridge

We are offering a bachelor degree program with two streams at the final level; power engineering and communication engineering. A third stream specialising in computer engineering will be introduced very soon, with the aim of graduating the first batch of computer engineers in 2020. The Department was one of the first units under its scope.

ICE - Department of Information and Communication Engineering

The website of Department of Information Engineering, CUHK. The department was established by Prof. Charles Kao in 1989. It was the first Information Engineering Department in Hong Kong and in the past twenty years, it had gained a world-wide reputation for its leading edge research and top quality programmes.
