5.2 Design Methodology and Criteria . 5.2.1 Major and Minor Manmade Open Channels . A major channel is designed to convey over 5 acres. A minor channel is designed to convey 5 acres or less. 5.2.2 Design Flow . Design flow for manmade open channels within a development is contained in Chapter 4.2.2.

### OPEN CHANNELS CHAPTER 5 Chapter 5 - Open Channels

Chapter 5: Design of Open Channels. Open channels are designed to carry a design discharge in a safe and economical way. For flood control channels the design discharge represents the peak discharge expected to result from a flood event of a specified return period. Normally, the design discharge is obtained from the hydrologic study of upstream watersheds.
