Understanding Dyscalculia ...

If dyscalculia is not recognized and addressed early on in life, it can cause problems as the child goes on to learn advanced mathematics, trigonometry, and other math-related subjects. If your child is confirmed as having dyscalculia, treatment and management measures should be initiated promptly.

If you have (or think you have) dyscalculia yourself, then sadly there is probably little that you can do to help your child. And you need to remember

that dyscalculia is a genetic illness - that means that it is passed from the parents to the child. But - and this is important - dyscalculia is not passed on automatically.
