Environmental Preservation And Conservation In

Conservation typically refers to attempts to make humans' relationship with the environment sustainable while still extracting natural resources. Conservationists usually support measures that reduce human use of natural resources, but only when such measures benefit humans.

Conservation or Preservation: Which Is Best?

Conservation & Preservation. The two terms conservation and preservation are often confused and are used to mean the same thing, although differences exist. Conservationists include those who accept that change and progression are necessary for a better future, but only when the changes take place in ways that are not wasteful. What the conservationist opposes is not the harnessing of nature for mankind's progression per se, but the

Environmental conservation and preservation

Environmental conservation vs preservation. Conservation or preservation of the environment is often quite similar. However, if we were trying to conserve forests, we may control which trees grew where. We may take out alien plants and plant more indigenous trees. Preservation of the forest would entail blocking that space off and allowing the forest to basically figure itself out. The area would ideally show little to no signs of human life.
