**Evaluating evidence on a balance of probability**====  
Reasonable Doubt v. Balance of Probability. In common law, two separate standards of proof are recognized- proof beyond reasonable doubt and proof based on the balance of probabilities. The former is he standard adopted while dealing with criminal cases while the latter is the standard in use in case of civil suits.

As Fig. 3 shows, the probability of H 2 given the evidence, P(H 2 | E) > P(H 1 | E). In Fig. 3, the chain only contains two hypotheses (H 1 and H 2), but there are situations where the chain is longer, e.g. H 1 —H 2 —H 3 - H 4 - E.

The fact-finder has to compare the probability of the evidence adduced at the trial under the plaintiff's theory of the case with the probability of the evidence under the defendant's theory of the case (the two need not add to 1), and award the verdict to the side with a higher probability (Cheng 2013).

The two different standards of proof are applied in the civil litigation and the criminal law respectively for consistency and certainty. There is no guessing what standard of proof applies. Even when a party in a civil action wants to show a crime, dishonesty or morally bankrupt conduct has taken place, the standard of proof is remains the balance of probabilities.

Evaluating evidence on a balance of probability The party bearing the onus in arbitration proceedings before the CCMA or a Bargaining Council must prove their version on a balance of probabilities. This simply means that their version must be more probable than the other party's version to succeed (also known as discharging the onus).

In UK employment law, tribunals make rulings based on balance of probabilities. This is a term you may often hear in court, and can be confusing when misunderstood. Think of this as a scale. Burden of proof means the employee has to provide evidence, and this evidence equals a certain value. (Let's say 20lbs)

Beyond Reasonable Doubt And Balance Of Probability Law Essay. The standard of proof, in essence, can be loosely defined as the quantum of evidence that must be presented before a Court before a fact can be said to exist or not exist. As the type of cases before a Court can be classified into criminal or civil, so can the standard of proof.

When assessing the probabilities the court will have in mind as a factor, to whatever extent is appropriate in the particular case, that the more serious the allegation the less likely it is that the event occurred and, hence, the stronger should be the evidence before the court concludes that the allegation is established on the balance of probability.

**Evidence, Probability, and the Burden of Proof by Ronald J**====  
In probability theory and statistics, Bayes's theorem (alternatively Bayes's law or Bayes's rule), named after Reverend Thomas Bayes, describes the probability of an event, based on prior knowledge of conditions that might be related to the event. For example, if the risk of developing health problems is known to increase with age, Bayes's theorem allows the risk to an individual of a known ...

1. Introduction 1.1 Evidence, proof and law 1.1.1 The importance of evidence and proof to law. I hope I am not making a false statement or even being unjust to someone if I say that, besides John Henry Wigmore, it was William Twining who in his lifetime contributed the most to draw attention to the extreme importance of 'evidence' and 'proof' to the law.

**Law of evidence - Ghana School of Law**  
Evidence, in law, any of the material items or assertions of fact that may be submitted to a competent tribunal as a means of ascertaining the truth of any alleged matter of fact under investigation before it.. To the end that court decisions are to be based on truth founded on evidence, a primary duty of courts is to conduct proper proceedings so as to hear and consider evidence.
