male-dominated work culture. Women are biologically and psychologically different from men. So of course, women behave and lead differently from men. However, women feel very often that they have to wear certain persona at work in order to fit with the expected leadership image.

Women in leadership - MEI Psychology Consulting

Although nowadays more women occupy leadership roles, they still are a minority. Because aspiration is a precursor of advancement, examining conditions fostering female leadership aspiration is important. A neglected perspective is the impact of organizational identification. Identification can be argued to foster leadership aspiration because the essence of leadership is the pursuit of ...

Gender and leadership aspiration: the impact of ...

Psychologists such as Eagly note a vicious cycle: If bias against women as managers restricts women's access to higher management positions, they're shut out from the chance to demonstrate their ability to handle line responsibility and further build their leadership skills. At the same time, women aspiring to management may consider their sex and their behavioral style in light of where they work.

When the Boss is a Woman - American Psychological Association

Oren Griffiths, Lynette Roberts, Josh Price, Desirable leadership attributes are preferentially associated with women: A quantitative study of gender and leadership roles in the Australian workforce, Australian Journal of Management, 10.1177/0312896218781933, 44, 1, (32-49), (2018).
