ClearCase Multisite feels like a clunky solution for global development. The need to keep copies of the same VOBs in various location and keep them in sync by sending change packets across the network can be problematic at times. This systems seems to require a good bit of manual intevention when the VOBs miss a packet and get out of sync.

IBM Rational ClearCase Reviews & Ratings 2020

"ClearCase was designed to support existing build systems rather than require the developer to use only ClearCase tools such as clearmake." A design choice isn't a weakness. The fact you could use your own build tools, and optimize the CM process for your own shop was a selling point.
