EVERYBODY? chemistry of terrestrial life is the only possibility, or just one chemical basis among many options that could be realized elsewhere. Furthermore, even if simple life is widespread, we can't assess the odds that it evolves into a complex biosphere. And, even if it did, the outcome might anyway

## **Amazon.com: Customer reviews: If the Universe Is Teeming ...**

FROM THE REVIEWS: Webb offers coherent, understandable, and sometimes humorous coverage of a diverse range of topics. He provides readers with non-trivial insights into research fields they may not have encountered previously . . . I think everyone who has ever considered the possibility that other intelligent civilizations exist elsewhere within our galaxy will enjoy Where Is Everybody?

## **If the Universe Is Teeming with Aliens ... WHERE IS ...**

If the Universe is teeming with aliens then where is everybody? It's one of the biggest conundrums in the Universe, known as the Fermi Paradox . That means that if the Universe is so conducive to life, and if there are so many opportunities for it within our galaxy alone, why isn't there any evidence (outside of the History Channel of extraterrestrial life?

## **IF THE UNIVERSE IS TEEMING WITH ALIENS WHERE IS EVERYBODY?**

The Universe is so unimaginably big, and it's positively teeming with an almost infinite supply of potentially life-giving worlds. So where the heck is everybody?

Galaxy alone, and perhaps 400 billion galaxies in the Universe, it stands to reason that somewhere out there, in the 14-billion-year-old cosmos, there is or once was a civilization at least as advanced as our own. The sheer enormity of the numbers almost demands that we accept the truth of this hypothesis.
