## **Implementing Problem Based Medical Education**

Author information: (1)Department of Medical Education, Kyungpook National University School of Medicine, Daegu, Korea. PURPOSE: This study aims to identify how problem-based learning (PBL) has been implemented in Korean medical education, and how it is evaluated by each medical school.

## **Implementation of problem-based learning in medical ...**

Problem-based learning, or PBL, is a pedagogical practice employed in many medical schools. While there are numerous variants of the technique, the approach includes the presentation of an applied problem to a small group of students who engage in discussion over several sessions. A facilitator, sometimes called a tutor, provides supportive guidance for the students.

The rapid adoption of competency-based medical education (CBME) provides an unprecedented opportunity to study implementation. Examining “fidelity of implementation”—that is, whether CBME is being implemented as intended—is hampered, however, by the lack of a common framework. This article details the development of such a framework.
