Provide a Punnett square to support your answers where indicated. Express probabilities as percentages. 1. Explain the difference between incomplete dominance and codominance: Incomplete = both alleles are expressed and the phenotype is a "blend" Codominance = both alleles are expressed and the phenotype is a mixture or patches of both of ...

## Incomplete-and-Codominance

Solving Genetics Problems. There is no dominant or recessive, the heterozygous condition results in a "blending" of the two traits. Example: Snapdragons can be red, white, or pink (heterozygous) Incomplete dominance - neither allele is dominant, red x white = pink Codominance - both are expressed in some way, red x white = white/red spots

## Incomplete Dominance & Codominance - The Biology Corner

Incomplete dominance Mendel's results were groundbreaking partly because they contradicted the (then-popular) idea that parents' traits were permanently blended in their offspring. In some cases, however, the phenotype of a heterozygous organism can actually be a blend between the phenotypes of its homozygous parents.
