11. Agglomeration and Local Innovation Networks in Japanese SMEs: Analysis of the Information Linkage Masatsugu Tsuji and Syoichi Miyahara

The Productivity Analysis of Industrial Clusters in India

The final part sets out new approaches for further development in the cluster through quantitative analyses of the 'economies of sequence' concept. Readers will discover that from establishing linkages between different industries and other economic sectors, important positive externalities can be generated and these processes can be triggered on the local or cluster level.
