Intellectual Property And Climate Change

Climate Change and Intellectual Property Addressing climate change is dependent on economic growth that works with, rather than against the environment. Innovative green technology solutions can help by allowing us to do more with less - be it alternative energy production, energy saving, or greener forms of transportation, agriculture and forestry.

Climate Change and Intellectual Property

In the wake of the international summits in Copenhagen and Cancun, there is an urgent need to consider the role of intellectual property law in encouraging research, development, and diffusion of clean technologies to mitigate and adapt to the effects of climate change. This book charts the patent landscapes and legal conflicts emerging in a range of fields of innovation - including renewable forms of energy, such as solar power, wind power, and geothermal energy; as well as biofuels, green ...
