Very little knowledge of contract theory and information economics is required. Familiarity with these fields, however, is useful in order to grasp more advanced topics (again, we will stick to fairly elementary modeling). The books by Laffont (1989) and Salanié (2005) offer concise treatments of contract theory.

A Theory of Incentives in Procurement and Regulation By Jean-Jacques Laffont and Jean Tirole Based on their pathbreaking work in the application of principal-agent theory to questions of regulation, Laffont and Tirole develop a synthetic approach, with a particular, though not exclusive, focus on the regulation of natural monopolies such as ...

~~Jean Tirole | French economist | Britannica~~

In the 1980s, Jean Tirole introduced game theory into the study of industrial organization, also known as IO. The key idea of game theory is that, unlike for price takers, firms with market power take account of how their rivals are likely to react when they change prices or product offerings.

~~Jean Tirole: The Theory of Corporate Finance~~

Why Jean Tirole Won the Economics Nobel. It's an ongoing game between two players with different goals and secrets that they can hide from each other. In the language of game theory, in which Tirole is expert, it is a "principal-agent" problem, where the government is the principal and the firm is the agent.
