chapter.

Lean Vs Agile Vs Design

Agile is itself a methodology, but you can use additional tools to make your team, department, or entire company more agile: Scrum; Kanban; DevOps; Startup thinking. Design thinking, lean startup, and agile are go-to concepts in the startup community, which is prized for its innovative approaches.

Design Thinking, Lean Startup, and Agile: What's The ...

The differences between Agile, Lean and Design Thinking are mainly about what tools you use to build a solution. First, let's look at the types of artifacts that each process typically involves building: Agile favors building working software. Design Thinking favors building UI mockups, sketches, and similar visual artifacts.

and practices but on the values that underpin all three methods.

Lean vs. Agile. vs. Design Thinking

Lean vs Agile. When teaching our Lean Professional class, I am often asked, “How is Lean different from Agile?” Lean and Agile are both operational excellence methodologies, and they both have the common goal of efficiently delivering the client’s most important requirements, when it is needed, with no additional cost or time.

Lean vs Agile - Which methodology should you choose

In this situation, Agile “wins” because the (valuable) activities of Lean Startup and Design Thinking rarely find their way into the same tools as the Agile activities. The result of this is that this work doesn’t get treated the same way as delivery work.
