21 Common Reactions to Trauma | Psychology Today

Trauma is a sensitive and difficult topic that may remind participants of their own experiences and trigger various responses during the training session. For example, some participants who have experienced trauma may attempt to share personal information, while others may become quieter or more withdrawn.

Trauma 101 Activity Packet - Safe Supportive Learning

Quotes from Listening to Trauma “Not knowing trauma or experiencing or remembering it in a dissociative way is not a passive shutdown of perception or of memory. Not knowing is rather an active, persistent, violent refusal; an erasure, a destruction of form and of representation.
