Autocom | Bluetooth & Wired Helmet Communication Headsets

Open the Autocom Active Plus or Super Pro AVI and locate the resistor with the number 221 on it. See attached diagrams - shamelessly lifted from Kieth's public web pictures. You might read the resistor as a 122 as the numbers are so small that it is easy to read them wrong and backwards. Make sure you have the correct resistor before

proceeding.

Autocom auto muting modification for the Super Pro AVI and ...

The Pro-7-Sport battery lead is designed for 9 volts only. The battery clip is designed for a PP3 battery. More than 9 volts will cause damage to the Pro-7-Sport. Less than 7.5 volts will cause the Pro-7-Sport not to function correctly. For 12-volt operation use part 152 (when mounting the Pro-7-Sport on a bike), or part 155

Autocom | Bluetooth & Wired Helmet Communication Headsets

The instructions to do this are in the back of the super pro avi instruction manual. Once the autocom box was closed up, we reconnected everything, plugged in the bluetooth dongle into Aux 1, it powered up. Ran it through the pairing sequence. Paired it to the Garmin Streetpilot 2820 and we tested it.

When you install a BTM02A module to an Autocom Super Pro AVI unit, you have to use the three-way lead supplied with the BTM02A and plug into Aux 1 & 2 (as well as the BT module). However, before you do this - you need to open the Autocom and cut a link to prevent 9v going to Aux 1 (this Bluetooth module is powered separately by a 12v feed rather than being powered from the Autocom unit itself).
