### RESEARCH METHODOLOGY STEP BY STEP GUIDE FOR GRADUATE STUDENTS

Basic research techniques are based on a formal process. The exact order of the steps depend on the subject and the reason for the research. The eight steps are the same for both basic and applied research. Historical research techniques are used to review data from the past and draw conclusions that impact on the present or future.

### **What are the Different Types of Research Techniques?**

Research design is a plan to answer your research question. A research method is a strategy used to implement that plan. Research design and methods are different but closely related, because good research design ensures that the data you obtain will help you answer your research question more effectively.
