~~Voices of war: Conflict and the role of the media~~

In a political environment defined by widespread polarization and partisan animosity, even simple conversations can go awry when the subject turns to politics. In their in-person interactions, Americans can (and often do) attempt to steer clear of those with whom they strongly disagree. But online social media environments present new challenges.

The news media have become the central arena for political conflicts today. It is, therefore, not surprising that the role of the news media in political conflicts has received a good deal of public attention in recent years. Media and Political Conflict provides readers with an understanding of the ways in which news media do and do not become active participants in these conflicts.

I was very happy with this book as I am writing a dissertation on how the media is more focused on environmental issues. It gave good case studies to use but detailed the politics and conflicts that come with reporting the environment in the news. It was a good read and not too long so was easy to get through.

In this article we argue that the process of social belief formation, and its consequences for the political economy of environmental policy, should be an integral part of the positive study of environmental regulation. The issues raised by this line of inquiry precede many of the questions our profession has traditionally focused on.
