proceed with higher magnifications to identify smooth muscle, extracellular tissue, epithelial cells, Goblet cells and the nuclei.

Virtual Lab: Microscopy Virtual Lab | Labster

Lab Work Not Included The purpose for completing this lab was to observe how microscopes function. The invention & evolution of the microscope has been an ongoing process since the Middle Ages, when the first convex magnifying lenses were introduced. In 1590, the Jansen Brothers invented the first compound microscope (two or more lenses). However, Antony van Leeuwenhoek created the first “true” microscope, in 1665, with 300x magnification & unbelievable resolution.
