~~Multimedia And The Web Creating~~

Multimedia is gaining popularity on the Web with several technologies to support use of animation, video, and audio to supplement the traditional
media of text and images. These new media provide more design options but also require design discipline. Unconstrained use of multimedia results
in user interfaces that confuse users and make it harder for them to understand the information.

~~Creating A Multimedia Project: Web Site - My Virtual Classes~~

We've looked at a lot of text so far in this course, but the web would be really boring only using text. Let's start looking at how to make the web
come alive with more interesting content! This module explores how to use HTML to include multimedia in your web pages, including the different
ways that images can be included, and how to embed video, audio, and even entire webpages.

~~Multimedia And Web Technology~~

Multimedia can be recorded for playback on computers, laptops, smartphones, and other electronic devices, either on demand or in real time
(streaming). In the early years of multimedia, the term "rich media" was synonymous with interactive multimedia. Over time, hypermedia extensions
brought multimedia to the World Wide Web.

~~Chapter 10 Multimedia and the Web~~

Web pages often contain multimedia elements of different types and formats. Browser Support. The first web browsers had support for text only,
limited to a single font in a single color. Later came browsers with support for colors, fonts, images, and multimedia! Multimedia Formats.
